

## REMARKS

In the Examiner's Office Action, Paper No. 04 dated 10-11-01, claim 33 has been rejected under 35 USC 102(b) as being clearly anticipated by Andis '616. The examiner has noted that the upper portion of the plate, i.e., the portion with holes the "back plate".

Claim 33 of the instant application claims a comb element with a plurality of comb teeth having a groove notch for engagement with a front edge of the cutting teeth of a clipper. The Andis '616 patent discloses a blade carrier 26 that at the front portion resembles a comb for the clipper cutting teeth. However, the blade carrier is attached by means of screws and is intended to support the cutting teeth. The disclosed device will not work without the blade carrier attached. In addition the blade carrier does not have a notch that engages the blade cutting teeth.

Based on the claim limitation of claim 33 that presents a comb element with a groove notch in the comb teeth attachable to cutting teeth of a clipper, it is believed the blade carrier feature of the Andis '616 patent is distinguished and there is no indication of anticipation of the claimed comb structure.

Claim 34 has been rejected under 35 USC 103(a) as being unpatentable over Andis '616. Claim 34 is now based on what is believed to be an allowable claim and therefore should be allowed.

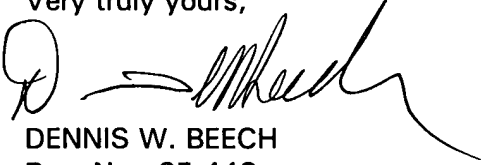

Claim 35 has been objected to as being dependant upon a rejected base claim. Based on the remarks concerning claim 33, it is believed claim 35 is now based on an allowable claim and therefore should be allowed.

Attached hereto is a marked-up version of the changes made to the application by this Amendment.

No additional fee for claims is seen to be required.

If you have any questions do not hesitate to contact me.

Very truly yours,

DENNIS W. BEECH
